*Mike +
Friends.*

What can I say to a group of people who are tops to work with, totally professional, dedicated to perfection and above all "Superpros clothed in their every day attire of Clark Kent, Video Person."

There really is only one thing left to say that I feel is of any importance - and that is . . . keep up the good work and let Chuck take de messages!

All kidding aside - It really was a great pleasure working with you people. I learned a few things about production, lighting, sound, sets, camera work, editing and "Stunt Things". But more importantly, I learned that there still are people who are proud of their profession, dedicated to it and enjoy their work.

Kelly - You are mature beyond your years and that maturity is reflected in your work. You are truly a pro, but in your case it's all spelled out - PROFESSIONAL! Thanks Kelly for a great production. We will certainly look forward to working with you on future projects.

Mike - If your camera work on our project is indicative of the future videos, you will shoot of your newborn and his/her growing up, then there probably is an Academy Award in your future. Good Luck New Dad!

Kim - Sound is, or can be an overwhelming task especially when there are hills and valleys to overcome! Your attention to detail (both through your earphones and on the set) added a lot to the overall quality of the finished video. We will always consider you one of the "Big Guns" in the Video Business. Thank You!
